## Projects

### Faceform - <https://faceform.netlify.com/>

A lightweight web app to create interactive surveys and forms.

- Consumed google login api to grant user access to app by generating JWT from my server app
- Used typescript and modern react hooks to manage state and context logic on the client side
- Deployed express app to heroku and react app to netlify
- Added cron job to delete error log at a specific day of the month on the express app

### Spotify Profile - <http://my-spotify-profile.herokuapp.com/>

Web app built with React, Node.js, Typescript, React hooks and Express for visualizing personalized Spotify data such as top artists, tracks, and audio features

- Refactored spotify web api authorization code
- Deployed both server and client to heroku
- Used modern react hooks to manage state logic on the client side

### Maximus - <https://maximus.inioluwa.com>

An ecommerce template inspired by Gymshark website. Includes order history, login, register, product, and collection pages.

- Hosted files to siteground cpanel
- Close attention to detail in replicating user interface of Gymshark.com
- Used handlebars to toggle between menus for easy navigation

## Experience

### Php developer - Kwickme (Remote)

October 2019 - Present // Ibadan, NG

- Modified current front end code to integrate new functional requirements using javascript, and CSS

## Skills

### Programming Languages

JavaScript (ES6), TypeScript, HTML, CSS/Sass, PHP, MySql

### Libraries & Frameworks
